EDUCATION

University of Santo Tomas **2023 - Present**
B.S. in Computer Science, Specializing in Data Science, Sampaloc, Manila

TECHNICAL SKILLS

Languages & Databases: Java, JavaScript, TypeScript, Python, SQL; MySQL, PostgreSQL, Supabase, Pocketbase
Web Development: React, Next.js, Hono, FastAPI, Tailwind CSS, SCSS, HTML, CSS
Machine Learning: PyTorch, Hugging Face Transformers, spaCy, XGBoost, scikit-learn, Jupyter
Tools & Cloud: Git, Docker, AWS, Vercel, Figma, DBeaver, Excel, Google Workspace

PROJECTS

Hybrid AI-Generated Text Detector | Undergraduate Thesis, University of Santo Tomas **2026**
Python • PyTorch • Hugging Face Transformers • spaCy • XGBoost • scikit-learn • FastAPI • Next.js • React • TypeScript • Jupyter • Vast.ai • Docker

- Lead engineer on a 4-person thesis team; co-designed the framework with groupmates (who helped clean the large datasets) and implemented the system end to end, from data pipeline and model to web application.
- Assembled a ~300k-text corpus from human writing (BAWE student essays, MGTBench) and AI outputs (GPT-3.5, Claude, Gemini); wrote the core cleaning pipeline that strips code, equations, citations, and URLs.
- Implemented a late-fusion classifier joining 10 spaCy stylometric features with 768-d ELECTRA embeddings in XGBoost, reaching 90.6% accuracy, 0.970 ROC-AUC, and a 7.8% false-positive rate on 21.8k held-out human passages (0.55 threshold).
- Diagnosed data leakage behind early near-perfect results (0.999 ROC-AUC): text length and citation tags revealed the source. Fixed it with length-matched passages and essay-grouped splits, cutting a length-only baseline's ROC-AUC from 0.998 to ~0.57.
- Compared against spaCy-only and ELECTRA-only baselines (paired t-tests over 10 folds, leave-one-AI-source-out testing); built a FastAPI and Next.js app that scores text passage by passage.

AWS Builders - UST Recruitment Platform | Full-Stack Developer **2026**
Next.js • React • TypeScript • Hono • PostgreSQL • Drizzle ORM • AWS Lambda • S3 • Gmail API

- One of 3 core developers on a 13-contributor team; the platform has processed 490 applicants this cycle.
- Built the application flow and a personal applicant dashboard showing results (accepted, rejected, redirected), with automatic digital membership ID generation once an applicant has paid.
- Developed the payment verification dashboard, listing paid applicants for the finance team's manual review, and automated notifications to applicants' UST emails through the Gmail API.
- Designed the interview scheduling concept and flow and contributed to its implementation; verified the platform before launch with manual testing, test cases, and automated test scripts.

Dolly's Closet - Inventory Management System | Lead Developer & Full-Stack Developer **2026**
Next.js • React • TypeScript • Supabase • Vercel • Monorepo

- Led 8 developers building an inventory system for a thrift (ukay-ukay) business; reviewed all pull requests in a monorepo.
- Replaced handwritten inventory tracking with a web dashboard, in production use for nearly a year and managing 65 products.
- Built authentication with OTP and notification emails (Supabase) and dashboard controls to publish, hide, or archive catalog items.

EXPERIENCE / EXTRACURRICULAR

Wyvern Innovations **Jul 2025 - Sept 2025**
Business Development Intern

- Executed QA test cases on customer applications nearing deployment, reporting defects ahead of the production deadline.

AWS Builders - UST **June 2026 - Present**
External Vice President / Chief Relations Officer

- Lead the Office of the CRO, overseeing the Marketing, External Affairs, and Sponsorships committees and their Executive Assistants.
- Developed 6 stakeholder outreach primers covering yearlong and one-time sponsorship and partnership scenarios.
- Secured 10 yearlong partners, including AWS-HERON and AWS-Adamson, and handled their MOAs for the launching event.

College of Information and Computing Sciences Student Council **Sept 2024 - Jun 2026**
Executive Associate to the External Vice President

- Raised ₱35,000 from 2 major sponsors for Roarientation, the freshman orientation, covering freshman merchandise and staff meals.
- Secured 15 booth sponsors for College Week and speakers and mentors from IBM and GCash for its hackathon.

TomasinoWeb **Aug 2025 - Present**
Frontend Developer

- Developed the homepage and redesigned loading screen for the annual recruitment website (join.tomasinoweb.org) in Next.js, React, TypeScript, and SCSS from UI/UX Figma designs, collaborating with the dev team.
- Built responsive layouts tested on mobile, tablet, and desktop, with accessible markup (alt text, keyboard navigation, color contrast, semantic HTML); Lighthouse accessibility 87 (mobile), 91 (desktop).

UST Technovation Society **Nov 2025 - Present**
Executive Assistant to the Chief Relations Officer

- Built the society's first sponsorship and partnership database in Google Sheets, organizing 1,000+ company and contact records.
- Contacted prospective sponsors and presented the organization's value proposition and partnership benefits.
